

# Chapter 10

## Public School Facilities Element

### Goals, Objectives, and Policies

### Summary of Changes

This element was updated to ensure consistency of verbiage and clarity of formatting. Updates were made to public school information and language was added to reinforce the City's commitment to stormwater management.

- Added an introduction to provide background.
- Reformatted zoning information into a table format for greater clarity and easy comparison (Policy s1.2.1).
- Added language referencing stormwater management (Policy s1.2.3).
- Updated to reflect correct state program and terminology; the reference to Florida safe ways to school program will be revised to “Safe Routes to School (SRTS) program (Policy s1.3.4).
- Removed the Level of Service (LOS) table, as the table has become outdated (horizon dates of 2011, 2013, and 2014). Since the Volusia County school board maintains a separate LOS document, a reference to this document will be added (Policy s2.1.3:).
- Removed reference to service area map no longer in use (Policy s2.2.3).
- Added policy to commit to maintaining consistent Level-of-Service standards with the Volusia County School Board. (Policy s2.2.7)
- Added updated maps of the DeLand area schools (Appendix).
