\*Compliance Engine is our third-party system reporting site. Inspections may be individually marked approved, but will not be considered complete or the permit closed until all acceptance and testing paperwork has been submitted to [www.thecomplianceengine.com](http://www.thecomplianceengine.com) for the permitted system. A passed inspection does not reset the permit expiration clock for The Compliance Engine uploads. This is considered part of the inspection and is required to be submitted within 30 days of an approved inspection.
